## Step 6. Edit Attach to Group

You are editing *Lisa Schwartz's New Investigation Contribution*

Edit: Organism Names Attach to Group of Organisms

To publish your treehouse you must attach it to the Branch or Leaf page for the group of organisms on the Tree of Life that your treehouse is about. For example, if your treehouse is about Ants, you would attach it to the Ant branch page. Visitors to the ToL will then be able to access your treehouse from the Ants branch page, and from ToL searches for Ants.

**Edit** the sections of this step below.

**To go to** another building step, the treehouse editor main page, or the treehouse manager, click the [links above](#).

**Warning!** Do not close the treehouse editor without [saving your work first](#).

#### Editing tip:

 [Organism Names](#)  [Attach to Group](#)

### Organism Names

In the space below write the scientific names of the organism(s) that your treehouse page is about. Separate individual names with a comma. You may also include common names, but scientific names are generally more precise in identifying a particular group of organisms.

### Attached to Group(s) of Organisms

Attach your treehouse to a ToL Branch  or Leaf  page

Ali's treehouse

Once attached, Ali's treehouse is found in the Ant  page treehouse menu.

Choose the organism(s) that your treehouse page is about. Your treehouse page will be linked to the ToL branch or leaf pages for these groups.

### Save and Preview Your Treehouse

After you click the save and preview button your treehouse should open in a new browser window.

Once the current version of your work has been saved, you can close this window and come back whenever you are ready to add more information.
